Switching Cameras - Zoom

The image shows the Zoom application settings window, specifically the 'Video' section. On the left is a sidebar with various settings categories: General, Video (highlighted), Audio, Share Screen, Chat, Background & Filters, Recording, Profile, Statistics, Keyboard Shortcuts, and Accessibility. The main content area is titled 'Settings' and features a video preview window at the top showing a man with a beard and glasses. Below the preview, the 'Camera' section is highlighted with a red oval. It contains a dropdown menu currently set to 'FaceTime HD Camera (Built-in)', with a second identical option visible in the dropdown list. Underneath, the 'My Video' section includes several checkboxes: 'Mirror my video', 'Touch up my appearance', and 'Adjust for low light' (all unchecked), and 'Always display participant name on their videos' (checked), and 'Turn off my video when joining a meeting' (unchecked).

Settings

- General
- Video**
- Audio
- Share Screen
- Chat
- Background & Filters
- Recording
- Profile
- Statistics
